

These fuchsias are hardy in different places on the West Coast of the Pacific Northwest area (USDA Zone 8, minimum temperature 10-20°F, with some micro-climates in Zone 7 & 9). They may or may not be hardy in your yard. Be brave and try some. They can reward you with continuous bloom.

The species, hybrids, and other cultivars listed below have been tested for at least three years in the Pacific Northwest. The new hardy varieties for 2007 are show in **hot pink**.

**Corrections and additions welcomed!** Contact [Salli Dahl](mailto:dahlhaus@myhome.net), [dahlhaus@myhome.net](mailto:dahlhaus@myhome.net) or (360) 736-4595.

Abbreviations:

\* **very hardy; does not need extra winter protection.**

+ **probably needs extra winter protection/mulch.**

No mark means average

or that no grower has indicated otherwise.

S- single corolla

SD- semi-double

D- double

Sp- a sport

T- trailing

Lax- somewhat upright

U- upright

**Color of sepals/ Color of corolla, Average height (Foliage)- colorful leaves. (E)- Encliandra cultivar**

Note- height will vary depending on water, the amount of light, fertilizer, pruning...
